1.5 Try it safely first 5

1 Quick start

This guide takes you from a bank statement to posted, receipted and reconciled payments in eight steps. Every screen is covered in full in the User Guide (FRD-UG-01).

> **Three rules**
>
> **Only verified money counts:** a balance changes only for money in the bank statement or cash Finance has matched to a deposit. **Two people:** whoever proposes, requests or reports can never approve or verify it. **Nothing is deleted:** duplicates, reversals and corrections are all kept as linked records.

1.1 Before you start

You need	Example
The application running, and your own user name	http://localhost:5090
The right role for your step	Finance reviewer to import, Operations to allocate, Finance approver to approve
The day's bank statement as CSV, with `TransactionId` and `Amount` columns	`bank-statement-26-oct.csv`
Cash collected at the desk, with its receipt-book number and deposit slip	`CRB-0915`, `DEP-77001`

1.2 The eight steps

Step	Who	Screen	What you do	Takes
1	Finance reviewer	Add payments	**Import bank statement**: choose the CSV and click **Import**. Read the result line (new, duplicates, conflicts, rejected).	1 min
2	Counsellor	Add payments	**Report cash collection**, then attach the receipt-book and deposit-slip numbers and click **Submit evidence to Finance**	2 min
3	Finance reviewer	Reconciliation detail	Check each cash deposit against the bank statement and cashbook, tick the confirmation, and click **Verify deposit**	2 min each
4	Operations	Unmatched payments	Work the queue from the top. The *Next* column says what is missing and who acts.	—
5	Operations	Reconciliation detail	Pick student, fee component and amount for each line. Write a reason (and evidence for a name-only match). Click **Propose allocation**.	1–3 min each
6	Operations	Reconciliation detail	For payments that cannot be allocated yet: **Request evidence**, **Escalate to Finance**, **Retry student lookup** or **Re-check bank feed**	1 min each
7	Finance approver	Reconciliation detail	Open each *Awaiting approval* payment. Click **Approve and post** or **Reject** with a reason. Apply any reversals.	1 min each

Step	Who	Screen	What you do	Takes
8	Finance	Overview, Audit log	Check that the control difference is ₹0, run **Verify integrity**, and **Export reconciliation (CSV)** for the day's file	2 min

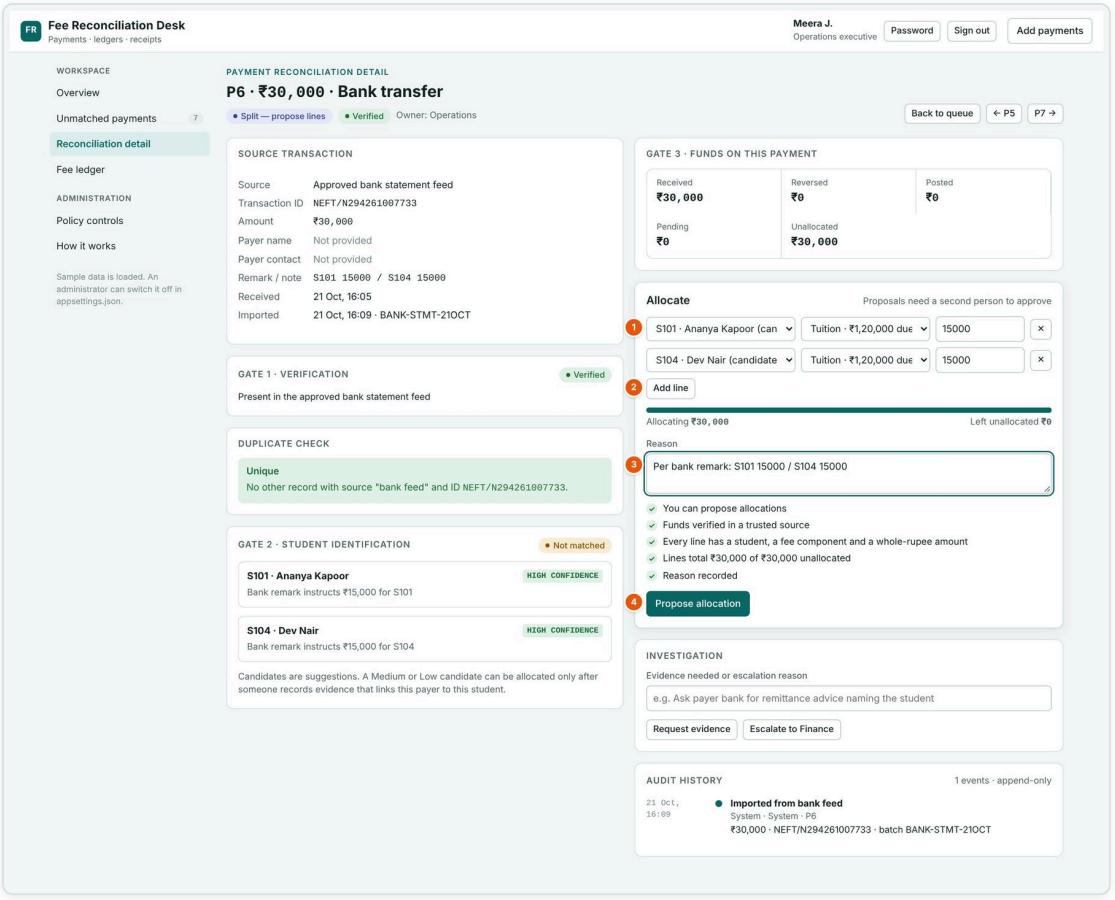

Figure 1: Step 5, proposing the P6 split; the checks must all be green

1.3 What decides the next step

What the payment carries	What the application does	What you do
A valid student ID in the reference (`S101`)	Matches automatically (policy AM-1)	Choose the fee component and propose
A split remark (`S101 15000 / S104 15000`)	Fills in one line per student	Check the lines and propose
Only a payer name or phone	Suggests candidates with a confidence level	Get evidence first, record it, then propose
Nothing at all	Leaves it unmatched	Request evidence or escalate
The same ID as an earlier line	Blocks it as a duplicate	Nothing; it is never counted
The same ID with a different amount	Raises *Same ID, different amount*	Finance confirms with the bank and closes it
A negative amount with `ReversalOf`	Links it to the original as a reversal	A Finance approver applies it
A student's claim only	Shows *Claim — not in bank records*	Wait for the bank line; **Re-check bank feed**

1.4 What the statuses mean

Status	Your action
Matched — choose fee component	Choose Admission or Tuition and propose
Split — propose lines	Check the lines and propose
Candidate — needs evidence	Record evidence before proposing
Cash — unverified / evidence with Finance	Counsellor attaches evidence; Finance verifies
Claim — not in bank records	Wait for the bank line, then re-check
Awaiting approval	A different Finance approver approves or rejects
Posting failed — retry	Click **Retry posting**; it never posts twice
Reversal — awaiting approval	A Finance approver applies it
Duplicate — not posted	None
Allocated and posted	None

1.5 Try it safely first

1. Sign in as **meera** with the demo password your administrator gives you.
2. Open **P6** from the queue. Set both lines to *Tuition*, write a reason and click **Propose allocation**.
3. Sign in as **kavita** and click **Approve and post** on P6.
4. Sign in as **zara** or **dev** to see the result from the student's side.
5. On **Overview**, the control difference should still read ₹0.
